

Generation Cognizant (GenC) Learner Handbook (SAP S4 HANA Automation Testing – v1)

Why do we need this GenC learning Program?

Gen C learning program engages young talents with a comprehensive learning pathway, giving the millennials an opportunity to interact with Subject Matter Experts (SME), understand the corporate environment, and groom themselves.

Cognizant emphasizes on Learner Autonomy where students take charge of their own learning, with the available tools and resources. More focus is on “learning” than “teaching”. Get ready to embark your own learning adventure!

Program at a glance

Learning consisting of 2 Stages:

- Stage 1 – SAP Product & Functional Testing
- Stage 2 – SAP S/4HANA & Automation Testing – Inclusive of the Project

Business Aligned Project

Interim KBA Evaluation + Technical Evaluation

Final Project Evaluation + Final Technical Evaluation

Program Highlights

- The complete learning journey is formalized using adult learning principles, where problem solving and applying the skills gained are given more importance than conceptual learning.
- Learner Autonomy is encouraged via Flipped Classroom, where the learning platform offers world class learning resources, and students would not be constrained by tutelage of an instructor.
- Get mentored by SME, whose motivation and guidance will help you accelerate in the learning journey.
- This program is applicable to Interns as well as GEN Cs.

This program encourages you to be more autonomous learners during guided self-learning hours, completing the learning objectives on your own pace and style, and get ready for the hands-on practice time.

The complete learning path is set in the [GEN C Learn Platform](#), which you can login with SSO.

Flipped Classroom

Self-Learning Time

- Go through the Learning Objectives
- Try to accomplish the learning objectives by accessing learning resources

Practice Time

- Get guidance from Subject Matter Expert
- Deep dive on to the learning concepts and solve a problem statement

Recommended Program Sequence

The learning journey contains 2 stages, followed by a Business Aligned Project.

- Stage 1 – SAP Product & Functional Testing
- Stage 2 – SAP S/4HANA & Automation Testing
- Business Aligned Project will provide you an experience of real time problem solving in Agile methodology.

Stage 1 – SAP Product & Functional Testing

Stage 2 – SAP S/4HANA & Automation Testing

Key Learning Components of the Program

Cognizant has collaborated with Udemy to provide world class learning videos for the evolving future of work. These Udemy programs are woven into a learning path, empowering you to plan and learn at your style.

The program also connects you with Subject Matter Experts (SMEs) to get the professional guidance on your queries in the learning journey.

The program doesn't ONLY concentrate on the Technical skilling, but also on the shaping up of the Behavioral skills. **Behavioral learning** would be done in ILT mode, with few Self-paced learning modules too.

Evaluation Model

The program continuously evaluates if you are able to apply those self-learnt skills to solve a real-time business problem. Depicted below are the four key learning components, which are distributed across the learning journey for the purpose of continuous evaluation.

- Interim Evaluation (Project + Technical) through Video Interview
- Final Evaluation (Project + Technical) through Video Interview

The above evaluation components will attribute to the Performance Health Status (PHS) of a GenC. Additional Learning Components like Hands-On, Code Challenges and ICTs will help you to enhance your expertise level.

Interim & Final Evaluation Approach

Below is the Evaluation Structure for GenC Learning Journey

The interim evaluation will be held halfway through the learning journey, while the final evaluation will take place at the end of the learning journey.

During the interim evaluation, the GenC will be interviewed by a Technical Subject Matter Expert (SME) from the Business Unit (BU) to assess your knowledge through a technical discussion. Additionally, the KBA Assessment completed by the GenC will also be evaluated by the BU SME. Please note that the Mini project is an individual activity and not a group activity.

During the final evaluation, the GenC will again be interviewed by a Technical SME from the BU to assess their knowledge through a technical discussion. In the same evaluation call, the Hackathon project completed by each group will be evaluated by the BU SME. Please note that the Hackathon project is a group activity and not an individual activity.

Program Completion Criteria

Stage 1 (Pre-requisites)
Gating Criteria: Qualifier Assessment

Stage 2 & Beyond (Advanced Skills)
Gating Criteria: Performance Health Status is Green

GenC/Intern Training	Evaluation Components	Pass Criteria	Evaluation Done by
Performance Health Status - PHS (only from Stage 2)	Interim Evaluation (Project + Technical)	Green, 1 Attempt	BU SME
	Final Evaluation (Project + Technical)	Green, 2 Attempts*	

Outcome of Interim / Final evaluation will be RED, AMBER or GREEN status

Note: 100% Completion of Hands On in Stage 1 is mandatory for qualifier assessment and 100% Completion of Hands On in Stage 2 is mandatory for interim / final evaluation eligibility.

Key Check Point Intervals in the Learning Journey

Progressing to Stage 2 depends on clearing the qualifier assessment after stage 1. Candidates who do not clear the Stage 1 Qualifier will be terminated from the Internship. However, based on the demand and later needs, they will be considered for the CSD mode of training.

Subsequent stages learning journey, your progress will be measured. On the below check point intervals, your overall Performance Health Score will be calculated as on date, and the RAG status will be arrived.

Table - Check Point Intervals

Check points	Interpreting Status
Interim Evaluation	- Green - On Track for Graduation - Red / Amber - There will not be any re-attempts given
Final Evaluation	- Green - On Track for Graduation - Red / Amber – Only 1 attempt are given (Re-attempt is not applicable if the student is Red in Interim and Final Evaluation) Note: If student fails after the applicable re-attempts, they will be considered as “Not-Graduated”.

Icebreaker

Icebreaker session will be conducted for a duration of initial **5 days**. During the session, various topics related to Corporate Induction, Talent Management, Cognizant Agenda on Core Values, Leader Talks, Alumni, BU Mentor connects will be covered. Followed by icebreaker, technical training will kick start.

Following sessions will be covered during the **5 days** of icebreaker

- Corporate Induction
- Talent Manager Connect
- Cognizant Agenda Sessions on Core Values
- Leader Talks (Academy) and many more...

A recommended day-wise schedule is provided below for the learning, with the learning content for the day, the practice hands-on and extended hands-on to be done for the day or any other activities are listed. Few days might be interleaved to accommodate the extension due to Behavioral Training.

GenAI-Program Overview

Introduction

AI Accelerate is a comprehensive program designed to empower learners with the knowledge and skills needed to harness the transformative potential of Artificial Intelligence (AI). This handbook serves as a guide, providing essential information and resources to help learners navigate through the program successfully. From understanding the fundamentals of AI to apply the advanced concepts in real-world scenarios. AI Accelerate is your gateway to unlock the power of AI and shaping the future of technology.

Program overview.

AI Accelerate offers a learning opportunity, allowing GenCs to engage learning through the self-paced learning, Expert connect, and Knowledge assessment to measure the skills.

Focus areas

- **Learning:** GenCs will have access to curated content and resources that cover a wide range of topics related to AI, including best practices, and case studies. This learning aspect aims to deepen GenCs understanding of AI and its applications in various industries.

- **Expert connect:** GenCs will have the opportunity to connect with expert in the field of AI. This expert will provide guidance, support, and insights to help GenCs navigate their learning journey and gain valuable insights into the industry.
- **Practice sessions:** GenCs can practice the use cases provided sessions that are designed to reinforce their learning and help them apply their knowledge in real-world scenarios. These sessions will provide GenCs with hands-on experience and practical skills that are essential for success in the field of AI.

Performance outcomes

Upon completing the self-paced learning component of AI Accelerate GenCs are expected to achieve the following performance outcomes:

- GenCs will demonstrate a thorough understanding of the fundamentals of AI, including key concepts, terminology, and principles.
- GenCs will be able to apply AI concepts and techniques to solve real-world problems, demonstrating their ability to analyze, design, and implement AI solutions.
- GenCs will develop and apply critical thinking and problem-solving skills in the context of AI, enabling them to identify, analyze, and address complex challenges.
- GenCs will collaborate effectively with peers, mentors, and industry experts to achieve common goals and contribute to the advancement of AI knowledge and practice.

Program workflow

Schedule – Stage 1: Week 1

Day 1 to Day 5 will be focusing on Functional Testing Fundamentals.

Udemy learnings are recommended in the Platform to understand the fundamental concepts. Apply the concepts learned and solve the Hands-on and Practice Case studies as recommended below.

Day 1

Functional Testing

Continuous Learning: Technical Enablement

[Learn Manual Software Testing + Agile with Jira Tool](#)

- Refer section 1 and 2 in this Udemy course and complete the corresponding learnings.

Section 1: Software Testing Introduction

- What is Software?
- Types of Software's?
- What is Software Testing?
- What is Software Quality?
- Project Vs Product
- Why do we need Testing?
- Error, Bug & Failure Why the software has bugs?

Section 2: Software Testing Concepts

- SDLC
- Waterfall Model
- Spiral Model
- V-Model
- Static Testing & Dynamic Testing
- Verification & Validation
- White Box & Black Box Testing Methods

Day 2

Functional Testing

Continuous Learning: Technical Enablement

Learn the basics of Software Testing Life Cycle

[Learn Manual Software Testing + Agile with Jira Tool](#)

- Refer section 2 in this Udemy course and complete the corresponding learnings.

Section 2: Software Testing Concepts

- Static Testing & Dynamic Testing
- Review, Walkthrough & Inspection
- QA & QC & QE
- Levels of Software Testing
- Unit Testing
- Integration Testing
- System Testing
- UAT Testing

- System Testing Types
- GUI Testing
- Usability Testing
- Functional Testing
- Non-Functional Testing
- Regression testing
- Re-Testing
- Smoke & Sanity Testing
- Exploratory Testing
- Adhoc Testing
- Monkey Testing
- Positive & Negative Testing
- End-To-End Testing
- Localization&Globalization/Internationalization(I18N) testing

Day 3 & 4

Functional Testing

Continuous Learning: Technical Enablement

Learn the basics of Software Testing Life Cycle

[Learn Manual Software Testing + Agile with Jira Tool](#)

- Refer section 2 and 3 in this Udemy course and complete the corresponding learnings.

Section 2: Software Testing Concepts

- Test Case Design Techniques
- Equivalence Class Partitioning (ECP)
- Boundary Value Analysis (BVA)
- Decision Table
- State Transition
- Error Guessing

Section 3: Software Testing Life Cycle (STLC)

- STLC
- Test Planning
- Test Design/Development
- Test Execution
- Defect Reporting & Tracking
- Test Closure
- Test Plan
- Use Case Vs Test Scenario Vs Test Case

- Test Case Template
- RTM (Requirement Traceability Matrix)
- Test Environment Setup & Test Execution
- Defects/Bugs
- Contents is Defect Report
- Defect Classification (Severity & Priority)
- Defect/Bug Life Cycle
- Test Closure/When To Stop Testing?
- Software Testing Metrics
- QA/Testing Activities
- Principles of Software Testing

Continuous Learning: Technical Hands-on

Mandatory Hands-on

- Hotel Booking

Deliverables Expected:

Deliverable 1: Identify four test scenarios for the mentioned requirement

Deliverable 2: Write all the test cases using the appropriate testing techniques wherever applicable

Deliverable 3: Log the below mentioned defects effectively with all the details, relating the requirement mentioned such that the developers would understand.

Day 5

Functional Testing

Continuous Learning: Technical Enablement

Learn the basics of Software Testing Life Cycle

[Learn Manual Software Testing + Agile with Jira Tool](#)

- Refer section 4 and 5 in this Udemy course and complete the corresponding learnings.

Section 4: Software Testing Live Project (E-Commerce Domain)

- Introduction to AUT, FRS, Creating Test Plan & Test Scenarios
- Test Cases & RTM (Requirement Traceability Matrix)
- Test Cases, Environment Setup(Test Bed) & Deploy Application
- Test Execution & Defect Reporting

Section 5: Agile Testing Process and Working with Jira Tool

- Agile Testing Process & Terminology
- Working with Jira Tool

Continuous Learning: Technical Hands-on

Mandatory Hands-on

- Students Enquiry Form

Deliverables Expected:

Deliverable 1: Identify four test scenarios for the mentioned requirement.

Deliverable 2: Write all the test cases using the appropriate testing techniques wherever applicable.

Deliverable 3: Log the below mentioned defects effectively with all the details relating the requirement mentioned such that the developers would understand.

Additional Learning:

Technical Quizzes:

- Functional Testing

Schedule - Stage 1: Week 2

Day 6 to 10 will be focusing on SAP S/4HANA Fundamentals.

Udemy learnings are recommended in the Platform to understand the fundamental concepts. Apply the concepts learned and solve the Hands-on and Practice Case studies as recommended below

Note: You'll find the hands-on and practice case study in the current learning path's module as per the names specified below.

Day 6

SAP S/4HANA Fundamentals

Continuous Learning: Technical Enablement

Learn and Practice

[SAP Simplified for Absolute Beginners](#)

- Refer this Udemy course and you may know the basic functionalities of SAP ERP, working with transactions in SAP and also learn to navigate with ease in SAP.

Cloud Fundamentals

Learn and Practice

[Microsoft Azure - Beginner's Guide + AZ-900](#)

- Refer the section in this UdeMy course and complete the corresponding learnings.
 - Section 1: Introduction
 - Section 2: Describe Azure architecture and services – Azure compute
 - Section 3: Describe Azure architecture and services – Networking
 - Section 4: Describe Azure architecture and services – Storage
 - Section 5: Describe Azure architecture and services – Database
 - Section 6: Describe cloud concepts
 - Section 7: Describe Azure architecture and services – Other services
 - Section 8: Describe Azure architecture and services – Identity and Access
 - Section 9: Describe Azure management and governance
 - Section 10: Putting everything together
 - Section 11: Practice Section

Day 7

SAP S/4HANA Fundamentals

Continuous Learning: Technical Enablement

Cloud Fundamentals

Learn and Practice

[Microsoft Azure - Beginner's Guide + AZ-900](#)

- Refer the sections in this UdeMy course and complete the corresponding learnings.
 - Section 1: Introduction
 - Section 2: Describe Azure architecture and services – Azure compute
 - Section 3: Describe Azure architecture and services – Networking
 - Section 4: Describe Azure architecture and services – Storage
 - Section 5: Describe Azure architecture and services – Database
 - Section 6: Describe cloud concepts
 - Section 7: Describe Azure architecture and services – Other services
 - Section 8: Describe Azure architecture and services – Identity and Access
 - Section 9: Describe Azure management and governance
 - Section 10: Putting everything together

[AWS Essentials](#)

- Refer sections in this Udemy course and complete the corresponding learnings.
 - Section 1: Introduction
 - Section 2: Module One: Introduction to AWS Cloud computing
 - Section 3: Module Two: AWS Foundational service
 - Section 4: Module Three: Security and Identity & Access Management
 - Section 5: Module Four: AWS Database
 - Section 6: Module Five: Elasticity and Management Tools

Day 8 & 9

SAP S/4HANA Fundamentals

Continuous Learning: Technical Enablement

Cloud Fundamentals

Learn and Practice

[Google Cloud Platform \(GCP\) Fundamentals for Beginners](#)

- Refer given sections in this Udemy course and complete the corresponding learnings.
 - Section 1: Introduction
 - Section 2: Overview of Google cloud
 - Section 3: Getting started with Google Cloud
 - Section 4: Google cloud compute services
 - Section 5: Google cloud storage service
 - Section 6: Google cloud network service
 - Section 7: Identity and service Management
 - Section 8: Google cloud Database service
 - Section 9: Google cloud Data and Analytics Services
 - Section 10: Google cloud AI and ML Services
 - Section 11: Google cloud DevOps Services
 - Section 12: Additional Google cloud services including Anthos
 - Section 13: Conclusion

Additional Learning: Technical Enablement

Go through below mentioned sections and implement the examples along with the author

[SAP SD FUNDAMENTALS \[101-BASICS\]](#)

- Learn about the SAP SD fundamentals with concepts and most common testing techniques used in SD Modules.

SAP S/4HANA Fundamentals

Continuous Learning: Technical Enablement

DevOps Tools

Learn and Practice

Go through below mentioned sections and implement the examples along with the author

[The DevOps Essentials - The Handbook](#)

- Refer the given section in this Udemy course and complete the corresponding learnings.

Continuous Learning: Technical Hands-on

- SAP HANA Fundamentals

Day 11 & Day 12

Qualifier Assessment

SAP S/4HANA KBA – MCQ Assessment

Skills : SAP S/4HANA

Assessment Duration:

No. of Questions in Assessment:

Passing %:

Functional Testing SBA – Skill based Assessment

Skills : Functional Testing

Assessment Duration: 4 hrs

No. of Questions in Assessment: 1

Passing %: 70

Schedule – Stage 2: Week 3 to 6

Day 13 to 32 will be focusing on SAP S/4HANA (O2C, R2R, P2P)

Udemy learnings are recommended in the Platform to understand the fundamental concepts.

Apply the concepts learned and solve the Hands-on and Practice Case studies as recommended below.

SAP S/4HANA (O2C, R2R, P2P)

Go through the below mentioned learning and apply the concepts learned and solve the Hands-on and Practice Case studies as recommended.

SAP Sales (O2C)

Continuous Learning: Technical Enablement

- [SAP_HANA_O2C_V0.1](#)

GenAI (Day 19)

Continuous Learning: Technical Enablement

Program completion criteria

Everyone must register for the following e-learning course on [C-Learn](#) and complete a KBA assessment on Moodle to successfully finish this program.

Online learning: C-Learn

Activity Code: **ELRNG01863**

Fundamentals of Generative AI [101-Basics]

This AI course is designed to equip learners with:

- The foundational knowledge and skills required to harness the power of Generative AI.
- The ability to identify opportunities for innovation and implementation of AI within their organizations.
- The skills to drive organizations toward a future of enhanced creativity and competitive advantage using AI techniques.

GenAI

Additional Learning: Technical Enablement

Try to complete the following additional Udemy courses (Optional) to learn more about GenAI and ChatGPT.

Courses	Duration (in hrs.)	What you'll learn
---------	-----------------------	-------------------

Generative AI for Beginners	3.5	✓ Detailed understanding of Generative AI ✓ Key concepts - LLM, Embeddings, Prompt Engineering, Fine Tuning ✓ Industry use cases and ideas that can be implemented ✓ Hands-on experience, creating a chatbot ✓ Future trends and how to stay relevant in post-GenAI world. ✓ Roadmap for continuous learning
Intro to ChatGPT and Generative AI	1.5	✓ How to prompt ChatGPT effectively ✓ How to skyrocket productivity using AI ✓ Understand Generative AI and the underlying technology ✓ Grasp the importance of AI ethics

Day 22 to Day 26

SAP S/4HANA (O2C, R2R, P2P)

Go through the below mentioned learning and apply the concepts learned and solve the Hands-on and Practice Case studies as recommended.

SAP Finance (R2R)

Continuous Learning: Technical Enablement

- [SAP_HANA_R2R_V1.1](#)

GenAI (Day 25)

Continuous Learning: Technical Enablement

Knowledge check - Moodle

Activity Code: **ATHDW335105**

GENERATIVE AI QUICK ASSESSMENT FOR ELEARNING QUIZ [101-BASICS]

- This assessment is to assess the knowledge of associates on Generative AI tools and concepts at a Beginner proficiency.

Day 26 to Day 29

SAP S/4HANA (O2C, R2R, P2P)

Go through the below mentioned learning and apply the concepts learned and solve the Hands-

on and Practice Case studies as recommended.

SAP Procurement (P2P)

Continuous Learning: Technical Enablement

- [SAP HANA_P2P_V1.2](#)

MOCK Evaluation through AI BOT (Day 29)

This is an auto-scheduled, AI-driven mock interview, intended to be taken before the interim evaluation. You will receive an auto-scheduled email notification three hours prior to the evaluation.

Details:

- Platform: Mail-driven platform
- Scope: AI will ask questions based on everything you have learned up to date
- Duration: 1.5 hours
- Questions: 15 skill-based Coding questions

Once you complete the evaluation, AI will provide feedback on your performance. This helps you to appear for Interim Evaluation.

Day 31, 32

SAP S/4HANA (O2C, R2R, P2P)

Go through the concepts learned and practice the Hands-on and Practice Case studies as recommended.

Interim Evaluation

In Interim Evaluation, KBA MCQ Assessment - SAP S/4HANA (O2C, R2R, P2P) and Interim Technical evaluation(by BU SME) will be conducted with only one attempt.

KBA MCQ Assessment

Skills : SAP S/4HANA (O2C, R2R, P2P)

Assessment Duration:

No. of Questions in Assessment:

Schedule – Stage 2: Week 7 to 12

Day 33 to 57 will be focusing on Elective - TOSCA/WORKSOFT/UiPath/ROBOT Framework and project case study.

Udemy learnings are recommended in the Platform to understand the fundamental concepts.

Apply the concepts learned and solve the Hands-on and Practice Case studies as recommended below.

NOTE: Given 4 Elective (TOSCA/WORKSOFT/UiPath/ROBOT) sections in this milestone, BU SME's will be aligned to assist you in applying the concepts learned and solve the Hands-on and

Day 33 to Day 57

Elective 1 - TOSCA

Continuous Learning: Technical Enablement

You will continue focusing TOSCA

Udemy learnings are recommended in the Platform to understand the fundamental concepts. Apply the concepts learned and solve the Hands-on and Practice Case studies as recommended below.

Continuous Learning: Technical Enablement

Learn the basics of Selenium with Datasource XML Parsing

[Tricentis Tosca: \(Beginner to Intermediate \) in easy steps](#)

Refer the sections in this Udemy course and complete corresponding learnings

- Section 1: Introduction
- Section 2: Introduction to Tricentis Tosca
- Section 3: Steps to Create New Project or Workspace
- Section 4: User Management in Tosca
- Section 5: Different Sections in Tosca Commander UI
- Section 6: Modules – Standard Modules and User defined Modules
- Section 7: Action Modes in Tosca
- Section 8: Designing Testcases in Tosca
- Section 9: Test Automation: UI Tests (Framework, Approach and writing Automated Testcases)
- Section 10: Test Automation: API Tests (Introduction, Approach and detailed examples)
- Section 11: Test Automation: Database Tests (Introduction, Approach and detailed examples)
- Section 12: Conditional Loops in Tosca
- Section 13: Complex Test Step Navigation actions – with Real use case example
- Section 14: Details about Test case Design (TCD)
- Section 15: ****Updated 2022**** Steps to get Trial License, Download and Install Tosca

Continuous Learning

- Chapter1_Introduction to TOSCA
- Chapter2_TOSCA Architecture
- Chapter3_How TOSCA works
- Chapter4_Features of TOSCA
- Chapter5_More about TOSCA

Continuous Learning: Technical Hands-on

Mandatory Hands-on

- Cognitive TestCase
- Dynamic TestCase Generation [Excel]
- Folder Structure
- Generate Instances
- Import Export Subsets
- Manual Step
- Requirement Mapping
- Test Step Library
- Tosca ActionMode

Elective 2 - WORKSOFT

Continuous Learning: Technical Enablement

Learn about Worksoft

- [Worksoft Overview](#)

Continuous Learning: Technical Hands-on

- Worksoft KBA

Elective 3 - UiPath

Continuous Learning: Technical Enablement

This would be BU Driven training and owned by BU SME's

Elective 4 - ROBOT

Learn about Robot Framework

Continuous Learning: Technical Enablement

[Learn Robot Framework \(Selenium\) from Industry Expert|22+hr](#)

Refer the sections in this Udemy course and complete corresponding learnings

Learn about Robot

- [ROBOT Automation](#)

Continuous Learning: Technical Hands-on

- Verify Webpage Title Details
- Run Specific Test Case
- Run Specific Test Case 2
- Using a FOR loop in a Robot Framework test case
- Using an IF ELSE condition in a Robot Framework test case
- Creating and using a user-defined keyword in Robot Framework
- Importing and using a library in a Robot Framework test case
- Handling an alert on a webpage in Robot Framework
- Selecting an option from a dropdown on a webpage in Robot Framework

- Switching to a frame on a webpage and performing an action in Robot Framework
- API Endpoint Testing
- Database Query Testing
- Mobile Application Testing
- Desktop Application Testing
- Test Case Tagging
- Test Case Setup and Teardown
- Test Case Listener
- Running Robot Framework Test Case on Selenium Grid
- Generating a Custom Report in Robot Framework
- Handling Multiple Windows in Robot Framework

Continuous Learning: Technical Assessment

- Framework KBA

Project Deliverable (Final Project)

Should start your final project parallel from Day 51 to 56.

Practice final Project and prepare for final technical evaluation.

Project Deliverable (Final Project)

Deliver your Final Project by end of Day 57

Day 58 - 60

Evaluation:

Final Project Evaluation + Final Technical Evaluation

What is Final Evaluation?

The Final Evaluation will be conducted to certify whether a GenC is eligible to enter into the BU or not. The skill of a GenC will be gauged on the application development and overall technical knowhow towards the end of GenC Training.

Tech SME from BU will be conducting the final tech evaluation. As a fallback, the project mentor can also steer this activity.

The final evaluation will be conducted as two phases. They are the following

1. Final Technical Evaluation
2. Final Project Evaluation

The mode of these evaluations will be any one of the following:

- F2F(face to face)
- Video Based

1. Final Technical Evaluation (FTE)

The BU Mentor will interview the GenC on various skills achieved throughout the training program and put a score which will be considered for the final PHS of the GenC.

2. Final Project Evaluation (FPE)

In this evaluation, the BU Mentor will be verifying the skills of a GenC on a project perspective. End of this evaluation, the BU Mentor will score the GenC's work based on various evaluation criteria.

How to learn each day?

Each day has a set of learning objectives. These learning objectives can be met by going through the Udeemy courses and by completing the hands-on exercises mentioned in the daily plan.

The below strategies will help you decide the learning approach.

Learning Strategy & Approach

Find below few imaginary profiles. For each of these profiles we have defined a recommended learning approach. This is not an exhaustive list. The approaches below might help invent a new way of learning.

Profile #1

Harry Reacher

Engineering Discipline: Electronics

Skills: Python, Ruby on Rails, nginx

Project: Mining Crime Data to get Route Cause Insights

Learning Approach to Programming Languages: I do not want to waste my time learning. I am more practice oriented. I want to work on the problem immediately

What will work for me?

- Directly complete hands on exercises
- Refer Internet or Udeemy Courses
- If hands on are implemented early, clarify your friends questions and troubleshoot their issues

Profile #2

Olivia Richards

Engineering Discipline: Computer Science

Skills: Java, C, C++

Project: Library Management System

Learning Approach to Programming Languages: I have interest, but I don't know where to start.

What will work for me?

- Go through the recommended Udemy Course
- Try completing the hands on exercises
- Get your clarifications solved with help from Tech SME
- Get help from other learners in your batch whom had already completed

Profile #3

Greg Anderson

Engineering Discipline: Civil

Skills: C

Project: Fiber reinforced concrete

Learning Approach to Programming Languages: I am scared of programming languages. I haven't got my hands dirty with coding

What will work for me?

- Go through the recommended Udemy Course
- Implement the coding along with the author of the Udemy Course
- Try completing the hands on exercises
- Clarify queries with SME
- Troubleshoot programming issues with help from SME or learner from your classroom whom had already completed

FAQ

1. Who can participate in this program?

Students who have enrolled for Full Internship Program (or) the Cognizant on-boarded GEN Cs can participate in this program.

2. Is there any pre-learning I should do?

No. This program is open to all students from any academic discipline.

3. How will I know my RAG status?

It will be shown to you in the GEN C learn Platform, in your Home Page.

4. Whom do I reach out in case of any queries?

Coach is your point of contact.

5. What is the significance of Hands-on in the overall learning journey?

Hands-on focuses on specific topics in a Skill, which you can try and execute in the Platform. Group of such Hands-on exercises will be packaged together as a Code Challenge. This Code Challenge will allow you to benchmark your skills in the learning journey. Hands On/ Code Challenges/ ICT are learning components which will help you in understanding the skills better.

6. What is Code Challenge?

A problem statement will be provided to you and you need to solve it using a single skill.

7. What is Integrated Capability Test (ICT)?

A case study problem statement will be provided to you, that you may need solve using the combination of Skills learnt in the given stage.

8. How many attempts are provided for the Coding challenge and ICTs? Is it open all the time for practice?

The Coding challenges and ICTs are open and there are 3 attempts to take them up.

9. What is the entry criteria for qualifier?

A minimum of 70% hands-on completion and attempt in the CC & ICT is the eligibility criteria for qualifier.

10. What skills are covered in the qualifier?

The skills of Stage 1 are covered in the qualifier. Only ONE attempt is provided to clear with a minimum score of 70%

11. What if I fail in the Interim evaluation?

Your coach will notify your performance in the Interim evaluation. However you can continue with the learning.

12. How many chances will I get in the Final evaluation?

You'll get 2 chances in the Final evaluation which covers ALL the skills in the learning journey.

13. Whom do I reach out in case of any queries?

Coach is your point of contact.
