

BRS – Demo Web Shop (Tricentis)

Modules: Registration & Login, Product Catalog & Search, Shopping Cart, Checkout

1. Purpose

Defines requirements for modules enabling user registration, product browsing, cart management, and checkout.

2. Requirements

Registration & Login

- Provide registration form with mandatory fields.
- Validate inputs before submission.
- Allow login with email and password.
- Display error messages for invalid login attempts.
- Provide logout option.

Product Catalog & Search

- Display product categories and listings.
- Provide search bar for keyword queries.
- Show product details (name, image, price, availability).
- Allow sorting and filtering of products.
- Display “No results found” when applicable.

Shopping Cart

- Allow adding products from listings or detail pages.
- Display cart icon with item count.
- Show cart page with product details and subtotal.
- Allow updating/removing items with automatic recalculation.
- Retain cart contents during active session.

Checkout

- Provide step-by-step checkout (billing, shipping, payment, confirmation).
- Validate mandatory fields at each step.
- Allow multiple payment methods.

- Display order summary before confirmation.
- Generate order confirmation message and unique order number.
- Send confirmation email to user.

3. Non-Functional Requirements

- **Performance:** Search, cart, and checkout steps must respond within 3 seconds under normal load.
- **Security:** Use HTTPS for all transactions; encrypt sensitive data; prevent SQL injection and XSS.
- **Usability:** Checkout flow must be simple and intuitive; site must be mobile-responsive.
- **Reliability:** Ensure 99.9% uptime for shopping and checkout modules.
- **Compatibility:** Support major browsers (Chrome, Firefox, Edge, Safari).
- **Maintainability:** System should allow easy updates to product catalog and checkout flow.
- **Scalability:** Must support high traffic during peak shopping seasons.
